Dr. Perry spends the time to understand the symptoms or issues slowing you down and treats them to get you back and active. She's an active athlete herself so understands the mindset of the athlete and knows when to dial them back so they don't have long term issues or accelerate their recovery.

Dr. Maddy has opened my eyes to SO many aspects about the workings of my body, kinesiology, and physiology. She is incredibly perceptive, and reads my body better than I can sometimes! She finds the smallest quirks that may need a few weeks to adjust or maybe it's just a minor fix and she has me walking out of her office tall and feeling GREAT! Her recommendations for a healthier lifestyle are paramount to her incredibly well-rounded schooling, and she very clearly is a chiropractor who knows her stuff. She is wise beyond her years!! I am so happy she can help me align my life and get healthier over time. Thank you so much Maddy!! You put me back together!

Dr. Maddy is a great Chiropractor and I highly recommend her. She listens well and has helped our family stay healthy for a number of years. By going to Dr. Maddy, I experience less pain and down time when running. She also helps me get back into alignment after long airline trips. My wife and mother both go to Dr. Maddy and experience similar results regarding improved health and mobility.

Dr. Maddy is the best! I have been seeing her for almost 3 years. I initially started going because I was having severe low back pain during marathon training. Not only did Dr. Maddy keep me active, she helped me reach my goal and cross the finish line. She has kept me healthy and active ever since. Your care is personalized as soon as you walk in the door at Performance Chiropractic and Dr. Maddy goes above and beyond for your well being!

It's your turn to feel great!
